How to reset the password. How can I do this? pls help me out.. I wish to download movies and TV Shows for free. What sites are available and they do have all the new movies and shows? please help, thanks . Make my portable phone use sim card from my laptop. I have 2 mobile phones that i would like to use on my laptop. is there a way i can somehow clone my sims and retain the current usage. My sims are to new and i have none.. What is the serial number on an Apple Watch? Searching for the IMEI number of an Apple Device. SmartMobi IMEI's or smart card numbers. Convert IMEI into Product Identification. Do I have to do this? I would have to get a replacement for the phone. It says I have a Samsung Galaxy Ace. . How can I find my mobile phone IMEI number (Samsung Galaxy Ace) online?. How can I find my mobile phone IMEI number (Samsung Galaxy Ace) online? Get IMEI, Serial Number Online. Get IMEI, Serial Number Online.Q: How to pass index with ngFor? In my application I have tabular data and need to display data in different way. Date { { task[i].date } } index is from 1 to N (number of objects). I want to show it vertically (for each date as a separate column) but I'm getting empty values. Where am I wrong? A: ng-container matColumnDef="date" should be ng-container matColumnDef="date[i]" instead of ng-container matColumnDef="date"

A: See this link This site is an imei to serial number converter, try out with your imei code and than choose other things like sim card Q: How to call a class in angularjs I'm trying to learn angularjs and went through a tutorial on udemy. After that I wrote the below code: var app = angular.module('myApp', []); app.controller('MainCtrl', function(\$scope) { \$scope.sidebar = 'Hello World!'; \$scope.message = 'Hello #1!'; }); Is it bad to call a class like this in angularjs when the module is already declared? I have seen many other examples where the class is used outside of a module and it seems to work fine. A: Its not wrong to call class as long as the class do not need to be added as a controller. If you want to use that class then you need to declare the module. var app = angular.module('myApp', []); app.controller('MainCtrl', function(\$scope) { \$scope.sidebar = 'Hello World!'; \$scope.message = 'Hello #1!'; }); app.factory('ApiService', function(){ var serviceObj = {}; return serviceObj; }); var a = new ApiService(); app.controller('mainCtrl', function(\$scope){ console.log(a); }); {{sidebar}} {{message}} This is called a Toyota Model 3. A story on by Mashable. The Japanese manufacturer wants to provide a cheap and accessible electric vehicle. The show car on display at the show gives us a look inside the design, f678ea9f9e
